kids know better...

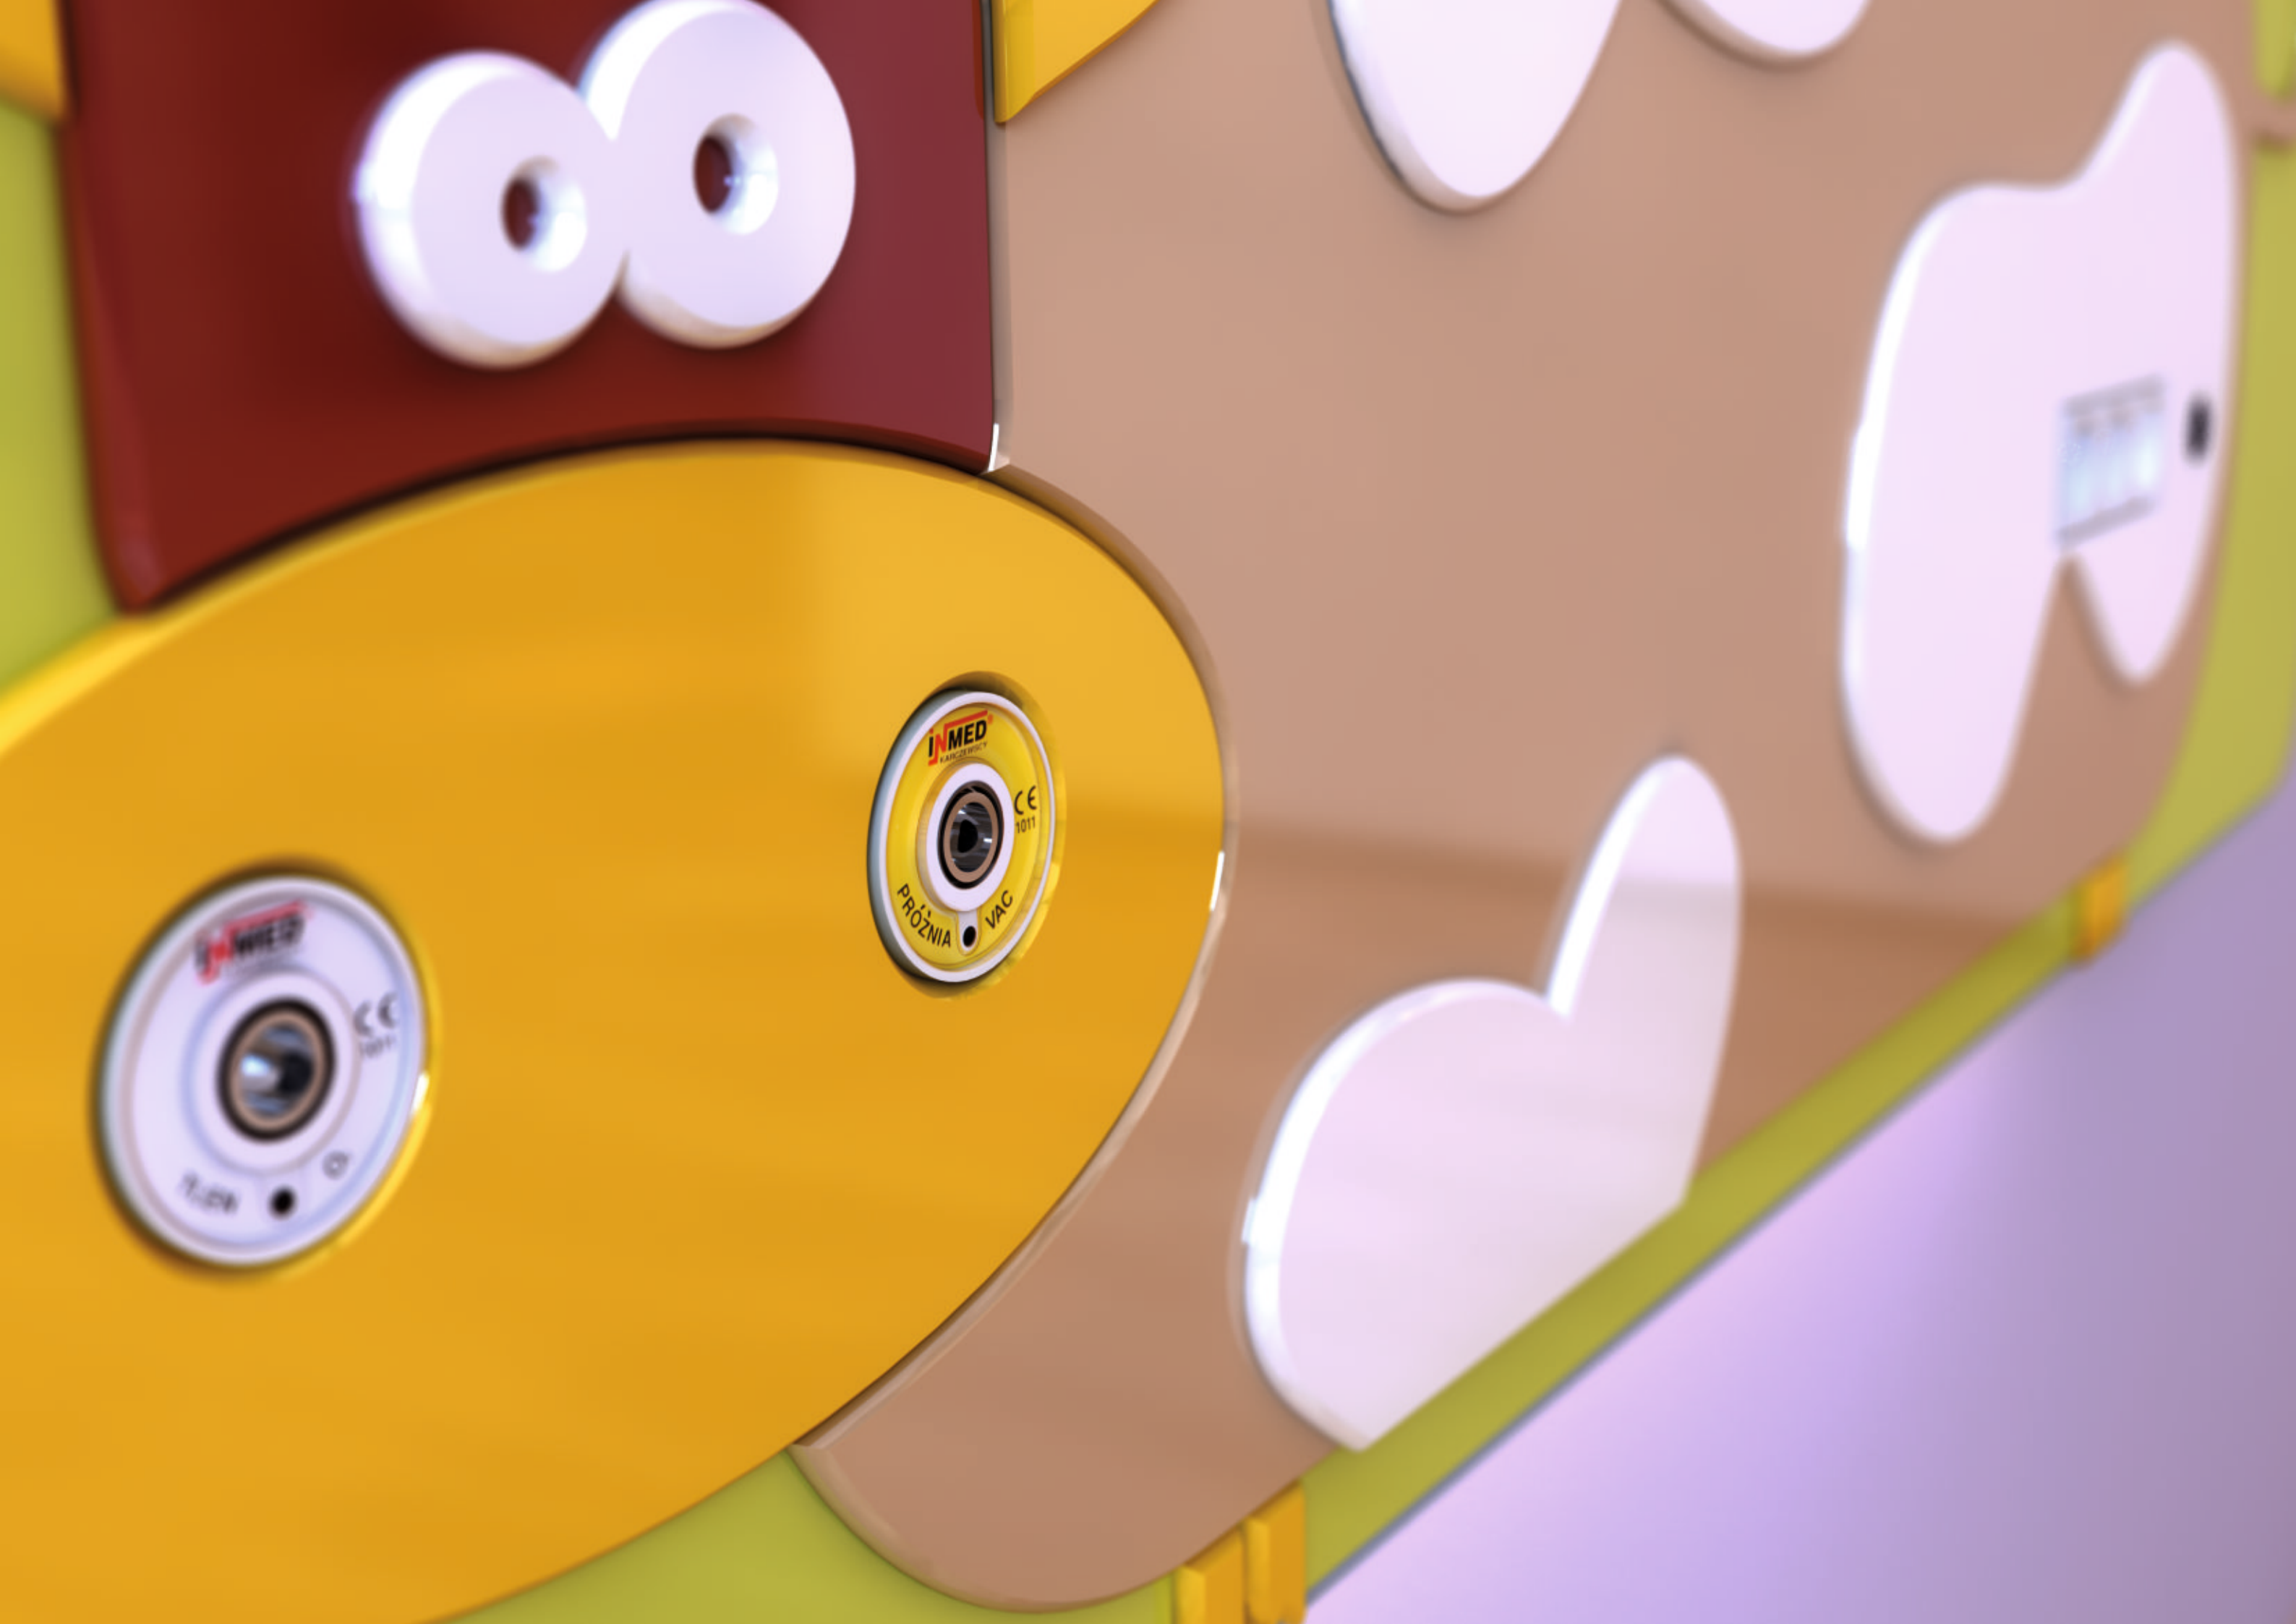

Children should never fear boredom in-hospital rooms anymore. Thanks to great variety of layouts in graphic arrangements of shapes and colors, MERYfun provides nicer and friendlier atmosphere in-hospital rooms and do not let kids be bored. High quality standards and innovative health and safety solutions grant MERYfun more recognition among kids in hospitals.

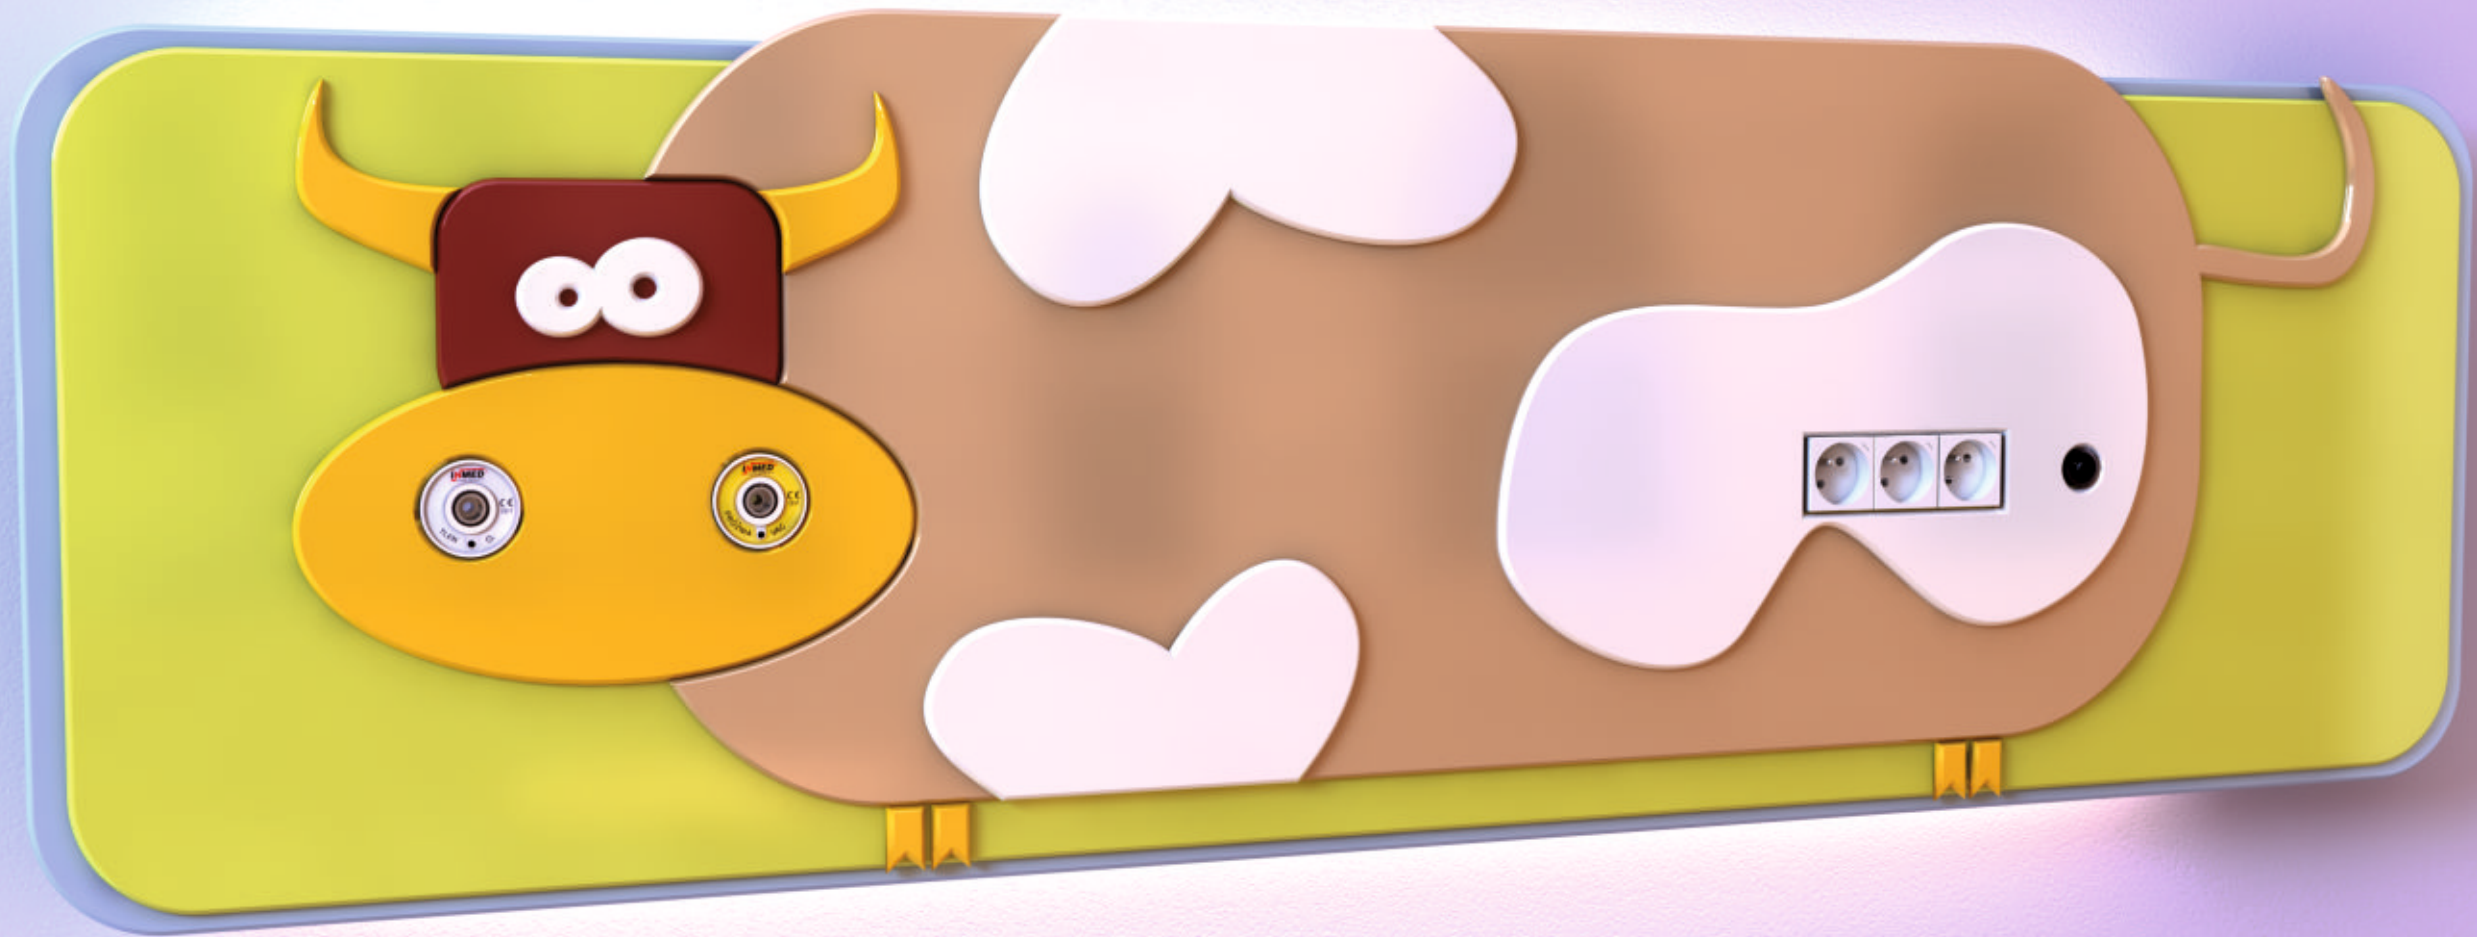

This bed head unit may be manufactured to meet variety of electrical, IT and light options including standard fluorescent and LED light and application of AmbientLight or ControllLight technology.

MERYfun is based on light aluminum ducts designed particularly for this unit providing all range of options of medical gas outlets, electrical and IT sockets.

Apart from standard electrical equipment we can employ electrical sockets made of antibacterial material including mechanical socket front cover. This provides not only comfort to all small patients but also safety by protecting them against any electrical installation failure or power surge.

components

Front graphic panels have been designed in compliance with health and safety regulations and are made of PVC or Corian® panels by DuPont®. In the event of mechanical damage they absorb the pressure. The three-dimensional graphics may be designed to create optically visual depth still in compliance with international health and safety regulations and standards of ergonomics.

For us safety is the priority and smile of little ones is a privilege. Anything more to wait for?
